**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arthur Freilich (Reg#19,281) on 07/28/2009.

**IN THE SPECIFICATION**

Please amend the abstract as follows to meet the 150 word maximum limit:

An implantable device including a housing having a stud projecting percutaneously through an incision in the patient's skin. The stud defines a peripheral surface extending longitudinally inwardly from the stud outer end. The longitudinal peripheral surface is used as a substrate to carry a peripheral fibrous layer which extends longitudinally along the stud from its outer end adjacent to the skin incision to below the patient's epidermal and dermal skin layers for promoting laterally directed soft tissue ingrowth. The housing also defines a lateral shoulder surface oriented substantially perpendicular to the longitudinal peripheral surface. The shoulder surface, when implanted, is located just inwardly from the patient's outer skin surface. The shoulder surface also carries a porous layer conducive to promoting tissue ingrowth. The provision of both lateral and longitudinal The porous layers on the device allows

tissue ingrowth, i.e., tissue growth into the interstices of both porous layers to form an enhanced infection resistant barrier while also providing improved device anchoring.

### **IN THE CLAIMS**

Please amend the claims as follows:

10. **(Currently Amended)** The medical device .of claim 4-22 wherein said stud carries a sound generator and is configured to percutaneously project into a patient's ear canal.
11. **(Currently Amended)** The medical device of claim 4 22 wherein said stud comprises a portion of an implanted catheter providing access to an interior body site.
12. **(Currently Amended)** The medical device of claim 4 22 wherein said stud includes a sensor coupled to an interior body site.

### ***Allowable Subject Matter***

Claims 3-8, 10-12 and 18-23 are allowed over the prior art of record as amended in the 5/29/2009 reply and in this office action.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device and method of an implantable device with longitudinal and lateral surfaces that are used to promote tissue ingrowth and create an infection resistant barrier.

The closest prior art of record is Beoni (USPN5,814,104) and Scarborough et al. (USPN5,895,426), however these references do not disclose the device as claimed or described above.

Regarding claims 22 and 23, the closest prior art of record fails to teach among all the limitations or render obvious the specifics of the porous layers carried on the housing body of the implant device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Koharski whose telephone number is 571-272-7230. The examiner can normally be reached on 7:30am to 4:00pm EST.
